## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-3, 5-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Wolters et al. 6,669,558.

Wolters et al. discloses a tailings conveyor (40) including:

- a housing with an upwardly directed chute having a discharge opening
- at least one rotary impeller (46, 48)
- an upper deflector panel (top of 62 seen in figure 4)
- a side deflector panel (side of 62 seen in figure 4)

The upper deflector panel extends downwardly from the top of the discharge opening, and the side deflector panel extends into the flow path at an acute angle (figure 4-6).

Regarding claims 3, 5-8, 12-13 and 15 the side deflector panel extends across the side-to -side extent of the flow in order to disperse the flow horizontally (figure 4).

Regarding claims 9 and 14 the deflector is open downwardly and in a sideward direction opposite the side deflector panel (figure 4).

Regarding claim 11, the discharge opening is disposed above and adjacent to the sieve.

Application/Control Number: 10/623,727

Art Unit: 3671

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by EP 576,737 A1 (Strubbe).

Strubbe discloses a tailings conveyor (44) including:

- an upper deflector panel (80)
- a side deflector panel (74, 76,77, 78)

The upper deflector panel extends from the top of the discharge opening, and the side deflector panel extends into the flow path at an acute angle (figure 3).

Regarding claims 3, 5-8, the side deflector panel extends across the side-to -side extent of the flow in order to disperse the flow horizontally (figure 3).

Regarding claim 4, the device has a mounting element (84).

## Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Meredith C Petravick whose telephone number is 703-305-0047. The examiner can normally be reached on M-T 8:00 a.m.- 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B Will can be reached on 703-308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
